PROFILE

Computer Science student (GPA 95) and incoming M.Sc. student in Machine Learning & Big Data, with hands-on experience developing backend applications using Python and JavaScript. Built RESTful APIs, microservices-based systems, and cloud-deployed applications using Node.js, Express.js, and MongoDB. Strong foundations in software engineering, operating systems, computer networks, and algorithmic problem solving.

SKILLS

Programming Languages

- Python, JavaScript, C, C++, SQL

Backend & Systems

- Node.js, Express.js, REST APIs, Microservices Architecture

Databases

- MongoDB Atlas, MongoDB, MySQL, Mongoose

Automation & Testing

- Postman, Playwright, Pytest

Cloud & Tools

- AWS, Git, GitHub, Render, VS Code, PyCharm

EDUCATION

M.Sc. in Computer Science – Machine Learning & Big Data

The Open University of Israel | Incoming (Oct 2026)

B.Sc. in Computer Science

04/2024 – 10/2026

HIT - Holon Institute of Technology

- **GPA: 95**
- **Distinguished Coursework:** Machine Learning (100); Object-Oriented Programming (100); Operating Systems (90); Computer Networks (94)
- **Dean's List (2024–2025)** - Awarded for academic excellence and consistent high performance.

PROJECTS

Expense Tracker Microservices Platform

Technologies: **JavaScript**, **Node.js**, Express.js, **MongoDB Atlas**, Mongoose, **REST APIs**, Postman

- Developed a **microservices-based expense tracking platform** using Node.js, Express.js, and an API Gateway.
- Designed RESTful APIs for **user management, expense tracking, reporting, and request logging**.
- Integrated **MongoDB Atlas** with Mongoose and validated APIs using **Postman** and **Pytest**.
- Deployed the application to **Render** for cloud-hosted testing and access.

Smart IoT Irrigation System

Technologies: **Python**, **MQTT**, **JSON**

- Designed and implemented a **Distributed IoT System** for **Real-Time Monitoring** and sensor coordination.
- Built an **MQTT-based Communication Architecture** for telemetry exchange between sensor nodes and a central service.
- Developed a dashboard for real-time visualization of environmental sensor data.
- Designed modular components to improve **Scalability** and maintainability.
